EDUCATION

Franklin W. Olin College of Engineering   2011-2012

Transfer student, **Class of 2014, GPA: 3.5**

University of Illinois at Urbana-Champaign   2009-2014

Bachelor of Science in Computer Engineering **GPA: 3.63**

SOFTWARE

I've worked with: CSS, Javascript, HTML, Java, C++

I'm good at: Ruby on Rails, Python

PROJECTS

Store M-app

A tablet interface for shoppers to guide them around a high-end clothing store. Designed after rigorous user interaction studies and using suitable design processes. Done as a part of Human Factors Interface Design class.

Book Reader

A revolutionary scanner made for scanning old books in a quick and easy manner. It is meant to be implemented in prisons to create a rehabilitation environment. I led the software design part of the system. Done as a part of Systems class.

Hermes

A harness accessory designed for people on crutches which aids in mobility and comfort. We created a full business plan, marketing plan, and distribution system of the product. I was the project manager of the team. This was done as a part of Product Design and Development class.

SketchBoss

An interface for machinists in academia which enabled them to interact with CAD, hand drawn sketches, and their work orders in an environment catered specially for them. Done as a part of User Oriented Collaborative Design class.
